COMPANY

Facet is a software company that provides artists and engineers tools aiming to redefine and humanize the creative process.

[Read more](#)

THE PROBLEM

Facet was outgrowing their current team structure and needed an experienced engineering leader to help build, scale, and mature the team. Additionally, the company is highly values-driven and prioritized diversity.

PLENTY'S SOLUTIONS

Since the target profile needed prior experience with design or productivity tools, Plenty carefully curated a 'top 100 target company' list. We then dug into each business looking for diversity, mentorship, and scale. Margaret's Master's Degree, experience scaling Slack, and her passion for mentorship fit perfectly. She accepted an offer 41 days after introduction.

MARGARET LE

Slack | Heroku

Margaret has a Masters in computer science and spent 4.5 years as an Engineering Manager at Slack, helping the company scale from 400 to 2k+ employees and a successful \$27.7B exit to Salesforce.
