TIME TO INTRO HIRE
27 days

TIME TO FILL
66 days

BACKGROUND

StageGlass uses real time 3D environments to help real estate developers sell pre-construction properties by creating a web-embeddable interactive experience that enables potential homebuyers to explore the space - before it even exists. [Read more](#)

THE PROBLEM

StageGlass was a year behind in the product and engineering plan, having mishired their first CTO. The company was under tremendous pressure to find the right candidate quickly to meet their ambitious growth targets but had a very unique set of CTO skills needed for the role to be successful.

PLENTY'S SOLUTION

Understanding the time-sensitive nature of this critical CTO role, Plenty wasted no time meticulously mapping the role requirements and conducting an exhaustive search. StageGlass saw immediate results with high calibre candidates presented. Plenty moved swiftly to reach 3 candidates at offer stage and filling the position within 66 days.

ANDRE BREMER
Intel | Amazon

Andre led Intel's cross-functional lab and engineering teams of 100+ to build software for their gaming functions. At Amazon, he led the Prime Gaming engineering division where he enabled the business to deliver Prime benefits and game content to players in excess of \$500M in revenue.
